

## **Military Type Handset for Micom R series radios**

### **HANDSET: H-250/U**

The H-250/U handset is now the standard handset used for tactical field communications requirements. It is utilized with manpack and fixed station radio and telephone equipment. The H-250/U features a press-to-talk switch, a retractile cord and is terminated with a 5 pin U-229U audio connector. The microphone element is of the noise-cancelling type.
