

Military Type External Speaker for Micom R series radios

LS-454/U

The LS-454/U is one of the most popular loudspeakers employed with military radio sets. The speaker can practically be employed with any radio and is of a water proof design. Features include a mounting bracket as part of it's rectangular enclosure, a 4 inches, 2 Watts, 8 Ohms permanent magnet cone type speaker type LS-445/U and is coupled through a sealed, 8 Ohms to 600 Ohms impedance transformer. The connecting cord has been seen with various terminations such as a U-229/U connector or a PJ-055B (1/4") jack.
